INTERNATIONAL CONFERENCE

ECOLOGICAL PERFORMANCE
IN A COMPETITIVE ECONOMY

PEEC 2019

7-8 March 2019

11th edition

Bucharest
Romania
**Goals**

Increasing environmental performances have become a priority requirement in the economic activity. The papers presented within the debates of the eleventh edition of the conference, PEEC 2008 - PEEC 2018, revealed, on the one hand, the complexity of problems, and, on the other hand, the variety of solutions. Meanwhile, they were enlightened numerous controversial aspects that need the confrontation of theoretical results with the practice of ecological policy elaboration and implementation in the continuously changing economic context.

Considering these evolutions, and also the severe restraints brought by the economic and ecological crisis the PEEC 2019 envisages: **Firstly**, to create premises for researchers, academics and public administration representatives, businessmen, and consultants to share their experience and expectations, learning from each other. **Secondly**, the conference pursues to raise the awareness level regarding the activities needed for the environmental compliance and the advantages of going beyond it. A better correlation of educational and research objectives in a priority interest field represents the third objective of the conference. Thus, it is envisaged to identify competences and information needed for a competitive ecological economy through collating different socio-professional categories.

**Venue**

Conference works include plenary and parallel sections. PEEC 2019 conference will be held in Bucharest, in the Academy of Economic Studies.

All necessary information regarding participants’ reception and accommodation, host university and papers organization in sections will be communicated in due time.
